SHAIK AMEERJAN

Bengaluru, India | +91 7075850587 | shaikameerjann@gmail.com | shaikameer.netlify.app | linkedin.com/in/ameer-shaikk | github.com/SHAIKAMEERr | leetcode.com/u/SHAIKAMEER_

Professional Summary

Java Backend Engineer (SDE-1) with **1+ year** of experience building multi-tenant SaaS APIs on a production platform serving **150+ suppliers and manufacturers**. Strong in **Java, Spring Boot, Spring Security (JWT, RBAC), MySQL, REST API design, and AWS (EC2, RDS, S3)**. Experienced in analytics APIs, test automation with JUnit, and CI/CD pipelines; ships reliable, well-tested features in close partnership with stakeholders.

Technical Skills

Languages: Java, MySQL, Python
Backend: Spring Boot, Spring AI, Spring MVC, Spring Data JPA, Hibernate, Spring Security, REST APIs, JWT, OAuth 2.0, RBAC, Microservices
Databases: MySQL, Redis
Cloud and DevOps: AWS (EC2, RDS, S3, IAM, VPC), Docker, GitHub Actions, CI/CD, Maven, Git
Testing and Tools: JUnit, Postman, Jira, IntelliJ IDEA, Eclipse, MySQL Workbench
Concepts: Data Structures and Algorithms, OOP, Design Patterns, OWASP Top 10, Multi-tenancy

Work Experience

Software Development Engineer I Sep 2025 – Present
Future Transformation (TraceCircle Product) *Bengaluru, India*
Tech: Java, Spring Boot, Spring Security, Spring Data JPA, MySQL, JUnit, Maven, AWS EC2/RDS/S3

- Built Spring Boot REST services across **4 core domains** (product and batch lifecycle, GTIN mapping, identifier generation, manufacturing workflows) for a multi-organization, multi-plant production environment.
- Delivered **4 battery-management modules** (master data, raw materials, manufacturing batches, BPAN generation) with business-rule validation and data-consistency checks.
- Secured multi-tenant APIs using **JWT authentication, RBAC, and organization- and plant-level authorization**; reduced vulnerabilities flagged in internal security audits by **40%**.
- Developed analytics APIs to track product creation, DPP/EOL coverage, and compliance metrics, and engineered analytical CO_2e calculations across **4 resource categories** (water, electricity, waste, emissions).
- Optimized JPA queries and persistence logic, improving data accuracy by **60%**; collaborated cross-functionally with QA and product teams to cut average bug-fix time by **25%**.
- Automated testing and deployment with JUnit, Postman, Maven, and AWS (EC2/RDS/S3): **95% test coverage** and **30% faster deployments**.

Java Developer Intern Sep 2024 – Nov 2024
HulkHire Tech (PayPal Payment Integration) *Hyderabad, India*
Tech: Java, Spring Boot, REST APIs, AWS EC2/RDS

- Developed Spring Boot payment-processing services handling **5,000+ transactions per minute**; improved throughput by **50%** using asynchronous communication.
- Integrated payment workflows via REST APIs and service-to-service calls to improve coordination across backend components.
- Improved transaction reliability with **3 safeguards** (request validation, transaction-state checks, failure recovery); deployed on AWS EC2 with RDS for persistence.

Projects

Workflow Configuration Platform | *Java, Spring Boot, Spring Data JPA, MySQL, React, REST APIs* 2026 – Present

- Designed a domain-agnostic platform where business workflows are configured through database-managed definitions, with **no workflow-specific code changes**.
- Built a visual drag-and-drop workflow editor with **4 configurable elements** (nodes, connections, step properties, validation rules).
- Implemented a metadata-driven form engine with reusable field definitions, conditional visibility, and configurable validation.
- Added centralized error handling and audit trails for configuration changes; designed for extension with async processing and CI/CD.

Education

Master of Computer Applications (MCA) 2021 – 2023
Madanapalle Institute of Technology & Science *CGPA: 8.23/10*

Bachelor of Computer Applications (BCA) 2018 – 2021
Shri Gnanambica Degree College *CGPA: 7.71/10*

Certifications

Apache Kafka and Zookeeper – In-Depth Understanding, Scaler Jan 2025
